EDUCATION

Islamic Azad University Central Branch

Bachelor of Science in Computer Science

Tehran, Iran

Sep. 2024 – Jun 2028

PROJECTS

Chemistry Calculator | *Python, Apache, Numpy, SciPy*

Apr 2026 – Present

- Developed a web application to calculate and balance stoichiometric equations
- Developed an API that automatically updates DNS records to point to a dynamically changing IP address(self hosting at home)
- Developed a technique that turns the problem into a null space mathematical problem
- Used python cgi to make the web interactive

Terminal-based Snake Game | *C++, windows api*

Feb 2026 – Present

- Built a snake game which works in all command lines using c++
- Developing libraries which make request calls to operating system directly

SNI-SPOOFING proxy | *Typed Script, Go*

Jun 2026 – Present

- Developed a vpn that bypasses internet firewalls using sni spoofing
- Developed a method that bypasses http-only google restriction using Man in the middle attack
- Developed a chained proxy which is able to tunnel tcp packets

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, HTML/CSS, Type Script, Go

Developer Tools:Git, Docker, Qemu, VS Code

Libraries: Scipy, Numpy, tensorflow
